

IN THE SPECIFICATION

Please revise the paragraph starting on line 7 of page 12 of the present application as follows:

When a copying process is finished, the process advances to step 115. In the step 115, the data base DTBS in the hard disc drive 12 is updated. In this case, since the musical piece is copied on the CD-R 20 in which the data is not recorded, the disc ID formed in the step 103, the number of the musical pieces that are copied on the CD-R 20, and a quality of all the data of the musical pieces (the number of ~~byres~~ bytes) are written in the data base DTBS as one set.
